

PANZERI® DESIGN

PANZERI®DESIGN

Qualità, tradizione, innovazione.

Sono questi i valori su cui si basa Panzeri, azienda che dal 1947 produce illuminazione e commercializza il Made in Italy in oltre 50 paesi nel mondo. La filosofia aziendale si sintetizza nella teoria di guardare sempre al futuro ma con un occhio attento al passato, grazie al patrimonio tradizionale e artigianale ereditato in oltre 65 anni di storia.

Lampade realizzate con cura e con attenzione ai dettagli, progettate per illuminare e per impreziosire spazi interni ed esterni con molteplici soluzioni in termini di stile, e prodotte in Italia in uno stabilimento produttivo eco-compatibile quasi interamente alimentato ad energia solare.

Quality, tradition, innovation.

These are the values that form the foundations of Panzeri, a company that has produced and sold lighting Made in Italy to over 50 countries worldwide since 1947.

The company's philosophy is summed up in the practise of constantly looking to the future while maintaining and respecting the past, its heritage of traditional craftsmanship with a history of over 65 years.

Panzeri lamps are made with care and attention to detail, designed to illuminate and decorate indoor and outdoor spaces offering multiple stylistic solutions, produced in Italy at an eco-compatible production plant almost entirely powered by solar energy.

Riconoscimento attribuito per oltre 50 anni di attività.
Recognition given for over 50 years of continuous activity.

Le lampade Panzeri sono la scelta ideale di professionisti e creativi che intendono inserire un'illuminazione dal design funzionale e personalizzabile in ambienti pubblici e privati.

Una scelta senza dubbio dettata dall'altissima qualità di ogni prodotto. La selezione delle materie prime, la sapiente tradizione e manualità per le lavorazioni più esclusive, le attrezzature e i macchinari di produzione all'avanguardia, le soluzioni innovative in ambito di tecnologie LED e un design tutto italiano, sono la chiave del successo di questa azienda che ha creduto sin dall'inizio - per mano del suo fondatore Carlo Panzeri - di poter diventare un punto di riferimento nel settore dell'illuminazione.

Panzeri lamps are the ideal choice for professionals looking for creative, functional and customizable lighting designs adapted for public and private environments.

A choice dictated by the undoubtedly high quality of all our products. Careful raw material selection, our long tradition of highly-skilled craftsmanship, the adoption of state of the art technology, innovative LED technology solutions and uniquely Italian design: these are the keys to the success of this company. These are the values we have believed in from the beginning - the ideas of its founder Carlo Panzeri - which has made our company a reference point in the lighting industry.

Vetreria_

Arte vetraria veneziana, maestria e tecnica lombarda si coniugano per creare queste nuove opere artigianali, ma nel contempo attuali e tecnicamente avanzate.

Venetian glassworking art combines lombard mastery and technical skill to create this new artisanal product which, at the same time, is both contemporary in look and technically advanced.

Die verbindung venezianischer glaskunst mit lombardischer fachkenntnis hat die kreation dieser neuen werke ermöglicht, die handwerkliche qualität mit zeitgenössischem stil und technischem fortschritt vereinen.

Vidrieria de arte veneziana, maestria y tecnica lombarda se conjugan para crear estas nuevas operas artesanal es al mismo tiempo actual y tecnicamente avanzadas.

Verrerie venitienne, maitrise et technicite lombarde se conjuguent pour creer ces nouvelles œuvres artisanales, mais au meme temps actuelles et techniquement avancees.

Искусство стекольщиков Венеции, мастерство и технологичность Ломбардии объединились, чтобы создать эти светильники: изделия ремесленные, но в то же время актуальные и использующие передовую технологию.

TECHNICAL INFORMATION

APPARECCHI CON LED A TENSIONE COSTANTE 24V DC
Le nostre strip LED sono state studiate per essere installate all'interno dei nostri prodotti, pertanto se installate al di fuori dei nostri apparecchi è necessario dissipare in modo adeguato. Il collegamento tra i vari apparecchi/LED deve essere effettuato in parallelo. Si deve calcolare la potenza complessiva dei LED e aggiungere almeno 10%. Di conseguenza procedere nella scelta dell'alimentatore. E' necessario considerare la distanza tra alimentatori e apparecchi/LED per limitare possibili cadute di tensione. Segue la tabella 1 che indica la lunghezza/sezione del cavo e la potenza con alimentazione a 24V DC. Viene indicata la distanza massima tra alimentatore e apparecchi/LED.

FIXTURES USING LEDS WITH A CONSTANT VOLTAGE OF 24V DC
Our LED strips are designed to be installed in our products so if installed elsewhere please consider thermal management by using proper heatsinks. The connection between the various fixtures / LEDs must be carried out in parallel. The total power of the LEDs must be calculated (+ at least 10%) in order to choose the correct power supply. The distance between power supplies and fixtures / LED must be considered to limit possible voltage drop. Table 1 (below) indicates the length / section of the cable and the output (W) using a 24V DC power supply. It shows the maximum distance between the power supply and the fixture/LED.

APPARECCHI CON LED A CORRENTE COSTANTE 350mA

Il collegamento tra i vari apparecchi/led deve essere effettuato in serie. Il numero di LED per alimentatore dipende dalla potenza e dalla tensione che l'alimentatore rende disponibile. Nonostante l'utilizzo di correnti molto basse è opportuno considerare la distanza tra alimentatori e apparecchi/LED. Segue la tabella 2 che indica la lunghezza/sezione del cavo con alimentazione a corrente costante. Viene indicata la distanza massima tra alimentatore e apparecchi/LED.

FIXTURES USING LEDS WITH A CONSTANT CURRENT OF 350mA

The connection between the various fixtures / LEDs must be carried out in series. The number of LEDs per power supply unit depends on the available power and voltage of the unit. Notwithstanding the use of very low currents, it is advisable to take into consideration the distance between ballasts and fixtures / LEDs. Table 2 (below) indicates the length / section of the cable using a constant current supply. It shows the maximum distance between the power supply and the fixture/LED.

TECHNICAL INFORMATION

WIRING DIAGRAM N°6

FONDAMENTI DI ILLUMINOTECNICA / LIGHTING BASICS

FLUSSO LUMINOSO Φ

Unità di misura: Lumen (lm)

Per flusso luminoso si intende l'intera potenza irradiata dalla sorgente luce che viene valutata con la sensibilità spettrale dell'occhio. Il flusso luminoso è una grandezza molto utile per confrontare le lampade tradizionali con i LED.

LUMINOUS FLUX Φ

Unit: Lumen (lm)

Luminous flux means the total power radiated by a light source, which is evaluated considering the spectral sensitivity of the eye. The luminous flux is a measurement very useful when comparing traditional lamps with LEDs.

INTENSITÀ LUMINOSA I

Unità di misura: Candela (cd)

Una sorgente luminosa irradia il suo flusso luminoso generalmente in diverse direzioni con diversa intensità. L'intensità della luce irradiata in una determinata direzione viene definita intensità luminosa.

LUMINOUS INTENSITY I

Unit: candela (cd)

A light source emits its luminous flux usually in different directions and at different intensities. The intensity of light radiated in a given direction is defined as light intensity.

ILLUMINAMENTO E

Unità di misura: Lux (lx)

L'illuminamento è dato dal rapporto tra il flusso luminoso irradiato e la superficie illuminata. L'illuminamento prodotto da un flusso luminoso di 1 lm che cade in modo uniforme su una superficie di 1 mq è pari a 1 lx.

ILLUMINANCE E

Unit: Lux (lx)

Illuminance is the ratio of the luminous flux and the illuminated surface. The illumination produced by a luminous flux of 1 lm that falls evenly on a surface of 1 square meter is equal to 1 lx.

LUMINANZA L

Unità di misura: Candela per metro quadrato [cd/m²]

La luminanza L di una sorgente di luce o di una superficie illuminata è determinante per la sensazione di luce percepita.

LUMINANCE L

Unit: Candela per square meter [cd/m²]

The luminance L of a light source or an illuminated surface indicates how much luminous power will be detected by an eye looking at the surface from a particular angle of view.

L'EFFICIENZA LUMINOSA

Unità di misura: Lumen per Watt (lm/w)

L'efficienza luminosa indica il rendimento di una lampada.

Viene espressa dal rapporto fra il flusso luminoso prodotto in lumen e la potenza applicata in watt.

LUMINOUS EFFICACY

Unit: lumens per watt (lm/w)

Luminous efficacy indicates the efficiency of a lamp.

It is the ratio between the luminous flux in lumens produced and the applied power in watts.

TEMPERATURA DI COLORE

Unità di misura: Kelvin (K)

Temperatura di colore indica la tonalità della luce. Più è alto il valore e più fredda è la tonalità della luce

3000K - tonalità calda

4000K - tonalità neutra

5500K - tonalità diurna

COLOUR TEMPERATURE

Unit: Kelvin (K)

Colour temperature indicates a light's tonality: the higher the value, the colder the tone of the light

3000K - warm tone

4000K - neutral tone

5500K - daylight tone

INDICE DI RESA CROMATICA

Ra oppure in inglese Color Rendering Index (CRI)

Si indica come resa cromatica la qualità della riproduzione dei colori sotto una certa illuminazione.

L'indice massimo di 100 rappresenta la resa cromatica ideale.

COLOR RENDERING INDEX

Ra or Color Rendering Index (CRI)

Ra is a quantitative measure of the ability of a light source to reproduce the colors of various objects faithfully in comparison with an ideal or natural light source.

The Ra maximum value 100 equals ideal color rendering.

MARCHI / MARKS

□ Apparecchio in classe II
Apparecchio nel quale la protezione contro la scossa elettrica non si basa unicamente sull'isolamento fondamentale, ma anche sulle misure supplementari di sicurezza costituite dal doppio isolamento o dall'isolamento rinforzato. Queste misure non comportano dispositivi per la messa a terra e non dipendono dalle condizioni di installazione.
Class II Fixture
A fixture for which protection against an electric shock does not rely only on basic insulation but also offers further safety measures, such as double insulation or reinforced insulation. These measures do not require grounding devices and are not dependent upon installation conditions.
Leuchten der Schutzklasse II
Die Schutzvorrichtungen gegen Stromschläge bei diesem Apparat basieren nicht lediglich auf der grundlegenden Isolierung, sondern werden durch eine verdoppelte oder verstärkte Isolierung wesentlich erhöht.
Aufgrund dieser Maßnahmen benötigen Leuchten der Schutzklasse II keine Vorrichtung für die Erdung und sind unabhängig von den Einbaubedingungen.
Aparatos de clase II
Aparatos en los que la protección contra descargas eléctricas no se basa sólo en lo fundamental, sino también en las medidas de seguridad adicionales, tales como el doble aislamiento o aislamiento reforzado.
Estas medidas no incluyen los dispositivos para poner en el suelo y no depende de las condiciones de instalación.
Luminaire classe II
Appareil dans lequel la protection contre les chocs électriques ne repose pas seulement sur les fondamentaux, mais aussi sur les mesures de sécurité supplémentaires, telles que la double isolation ou l'isolation renforcée.
Ces mesures ne comprennent pas les dispositifs de mise à la terre et ne pas dépendre des conditions d'installation.
Изделие II класса.
Аппарат, в котором защита от поражения электрическим током обеспечивается не только стандартной изоляцией, но и применением дополнительных мер безопасности таких как двойная или усиленная изоляция. В приборах отсутствуют средства защитного заземления и защитные свойства окружающей среды не используются в качестве меры обеспечения безоп.

III Apparecchio in classe III
Apparecchio in cui la protezione contro la scossa elettrica si basa sull'alimentazione a bassissima tensione di sicurezza e in cui non si generano tensioni superiori alla stessa. Nota: un apparecchio in classe III non deve essere provvisto di messa a terra.
Class III Fixture
A fixture in which protection against an electric shock is guaranteed by the extremely low and safe voltage level of the power supply, which does not generate higher voltage levels. NB: a Class III fixture does not require grounding protection.
Leuchten der Schutzklasse III
Gerät in dem der Schutz gegen elektrische Stromschläge auf einer sehr niedrigen Spannung beruht und in dem keine höheren Spannungen entstehen
N.B.: Ein Gerät der Klasse III braucht keine Erdung.
Aparatos de clase III
Aparatos en los que la protección contra choques eléctricos se basa en una tensión de seguridad muy baja y no generar mayores tensiones. Nota: una Clase III no debe contar con la protección de tierra.
Luminaire classe III
Appareil dans lequel la protection contre les chocs électriques repose sur une basse tension de sécurité très et vous ne génèrent pas de tensions plus élevées. Note: la classe III ne doit pas être munis d'une protection au sol.
Изделие III класса.
Аппарат, в котором защита от поражения электрическим током основана на питании от источника безопасного сверхнизкого напряжения и в котором не возникают напряжения выше безопасного сверхнизкого напряжения. В оборудовании класса III не должно быть заземляющего зажима.

IP.. Grado di protezione
Il grado di protezione degli apparecchi di illuminazione viene indicato con la sigla "IP" seguita da due cifre caratteristiche.
- la prima indica la protezione contro la penetrazione dei corpi solidi e della polvere
- la seconda indica la protezione contro la penetrazione dei liquidi
Protection Index
The protection rating of the lighting appliances is shown by the letters "IP" followed by two characteristic digits
- the first of these two digits indicates the degree of protection that the appliances offer against the entry of solid foreign objects
- the second one indicates the protection against the entry of water
Berührungs- und Fremdkörperschutz
Der Schutzgrad des Beleuchtungsgerätes wird mit der Abkürzung "IP" und zwei bestimmten Zahlen genannt.
- die erste beschreibt den Schutz gegen das Eindringen von Festkörpern und Staub
- die zweite beschreibt den Schutz gegen Flüssigkeiten
Grado de protección
El grado de protección de los aparatos de iluminación se indica con el símbolo "IP" seguido de dos números característicos.
- el primer número indica el grado de protección contra la penetración de polvo, de cuerpos sólidos
- el segundo indica la protección contra los líquidos
Degré de protection.
Le degré de protection des appareils d'éclairage est indiqué par le symbole "IP" suivi de deux numéros caractéristiques
- le premier numéro identifie la protection contre la pénétration des corps solides, de la poussière
- le deuxième identifie la protection contre la pénétration des liquides
Степень защиты.
Степень защиты светильника от внешних воздействий обозначается кодом IP и двумя цифрами.
- первая цифра обозначает степень защиты от проникновения внутрь посторонних предметов и пыли
- вторая цифра показывает стойкость к воздействию влаги

IK Grado di protezione degli involucri per apparecchiature elettriche contro impatti meccanici esterni (codice IK)
Degree of protection provided by enclosures for electrical equipment against external mechanical impacts (IK code)
Schutzarten durch Gehäuse für elektrische Betriebsmittel (Ausrüstung) gegen äußere mechanische Beanspruchungen (IK-Code)
Grado de protección de las envolturas para aparatos eléctricos contra impactos mecánicos exteriores (código IK)
Degrés de protection procurés par les enveloppes de matériels électriques contre les impacts mécaniques externes (code IK)
Степень защиты, обеспечиваемая корпусом для электрического оборудования от внешних механических воздействий (IK код)

☼ Lampadina protetta contro esplosioni
Lamp protected against explosion
Explosiongeschützte Lampe
Bombilla protegida contra la explosión
Lampes antidéflagrantes.
Лампа защищена от взрыва.

MARCHI / MARKS

RoHS

RoHS - DIRETTIVA 2002/95/CE (Restriction of the use of certain Hazardous Substances in electrical and electronic equipment) Direttiva europea che limiti l'utilizzo di alcune sostanze pericolose (piombo, cadmio, mercurio, cromo esavalente, bifenili polibromurati, Eteri difendi polibromurati. A partire da 1 luglio 2006 tali sostanze non possono essere più impiegate nei prodotti elettrici ed elettronici, salvo deroghe su alcune applicazioni.

RoHS - DIRECTIVE 2002/95/CE (Restriction of the use of certain Hazardous Substances in electrical and electronic equipment). The European Directive restricts the use of some dangerous substances: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE). From 1st July 2006 such substances shall not be used anymore in electrical and electronic equipment apart from exceptions on specific applications.

RoHS - RICHTLINIE 2002/95/CE (Restriction of the use of certain Hazardous Substances in electrical and electronic equipment). Die Eu Richtlinie stellt, dass ab dem 1. Juli 2006 neu in Verkehr gebrachte Elektro- und Elektronikgeräte kein Blei, Quecksilber, Cadmium, sechswertiges Chrom, polybromiertes Biphenyl (PBB) bzw. polybromierten Diphenylether (PBDE) enthalten sollen.

RoHS - DIRECTIVA 2002/95/CE (Restriction of the use of certain Hazardous Substances in electrical and electronic equipment). La Directiva impone que, a partir del 1 de julio de 2006, los nuevos aparatos eléctricos y electrónicos que se pongan en el mercado no contengan plomo, mercurio, cadmio, cromo hexavalente, polibromobifenilos (PBB) o polibromodifeniléteres (PBDE).

RoHS - DIRECTIVE 2002/95/CE (Restriction of the use of certain Hazardous Substances in electrical and electronic equipment). La directive européenne prévoit que à compter du 1er juillet 2006, les nouveaux équipements électriques et électroniques mis sur le marché ne contiennent pas de plomb, de mercure, de cadmium, de chrome hexavalent, de polybromobiphényles (PBB) ni de polybromodiphényléthers (PBDE).

RoHS - DIRETTIVA 2002/95/CE (Restriction of the use of certain Hazardous Substances in electrical and electronic equipment) Европейская директива, которая ограничивает использование некоторых опасных веществ (свинца, кадмия, ртути, шестивалентного хрома, полибромированных бифенилов (PBB) и полибромированных дифениловых эфиров (PBDE). С 1 июля 2006 года эти вещества не могут быть больше использованы для производства электрического и электронного оборудования, за исключением некоторых специальных применений.

Marchio unico di certificazione EAC (EurAsian Certification) che sostituisce i marchi nazionali GOST (R per la Russia, B per Bielorussia e K per Kazakistan)

Unique brand of EAC certification (Eurasian Certification) which replaces the national GOST brands (R for Russia, B for Belarus and K for Kazakhstan).

Einiges Markeszeugnis EAC, als Ersatzung des Landesmarkengost (R für Russia, B für Bielorussia und K für Kazakistan).

Marca única de certificación EAC que substituye las marcas nacionales Gost (R por Russia, B por Belarus y K por Kazakhstan).

CONSORZIO PER LA RACCOLTA E LO SMALTIMENTO DELLE APPARECCHIATURE DI ILLUMINAZIONE.

PANZERI CARLO SRL ADERISCE AL CONSORZIO ECOLIGHT – MILANO ITALY

WEEE - DIRETTIVA 2002/96/CE, 2003/108/CE (WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT) RIFIUTI DI APPARECCHI ELETTRICI ED ELETTRONICI.

La direttiva valida su tutto il territorio dell'Unione Europea definisce una serie di misure allo scopo di prevenire la produzione di rifiuti di apparecchiature elettriche ed elettroniche; di promuovere il riutilizzo, il riciclo ed altre forme di recupero di tali tipologie di rifiuti; di limitare i rischi di impatto sull'ambiente derivanti dal trattamento e dallo smaltimento dei rifiuti in questione; di armonizzare le misure nazionali di gestione dei rifiuti elettrici ed elettronici.

Gli apparecchi di illuminazione marcati con l'apposito simbolo del cassonetto barrato  sono soggetti a raccolta differenziata separata dal resto dei rifiuti urbani.

Per la restituzione di un dispositivo dimesso, occorre servirsi dei sistemi di restituzione e di raccolta messi a disposizione nei singoli paesi di utilizzo.

PANZERI CARLO SRL JOINS CONSORZIO ECOLIGHT – MILANO ITALY

WEEE - DIRECTIVE 2002/96/CE, 2003/108/CE (WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT).

The European Directive is applicable throughout the European Union and determines the measures in order to prevent the production of waste electrical and electronic equipment; to promote the re-use, the recycle and other forms of reutilization of these kind of waste; to restrict the risks of impact to the environment coming from treatment and disposal of these equipments; to harmonize national measures of managing waste electrical and electronic equipment.

Equipment marked with proper symbol of crossed container  may not be disposed of with household rubbish.

To return the used device, the return and collection systems available in every single Country must be used.

PANZERI CARLO SRL GEHÖRT DEM CONSORZIO ECOLIGHT (MILANO – ITALY) AN.

WEEE - RICHTLINIE 2002/96/CE, 2003/108/CE (WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT).

Die Eu Richtlinie gibt den Rahmen für die EU-weit gültige Maßnahmen, um die Produktion von Elektro- und Elektronik-Altgeräte zu verhindern; um Rückführung und andere Formen von Wiederverwendung zu fördern; um Einschränkung der Risiken gegen die Umwelt, die diese Abfälle verursachen können; um die Ländermaßnahme im Rahmens der Elektro- und Elektronik-Altgeräte zu harmonisieren.

Das Gerät gezeigt mit der bestimmten Kennzeichnung  dürfen nicht mit dem Siedlungsabfall entsorgt werden.

Für die Rückgabe des Altgeräts muss man die verfügbare Rückgabe- und Sammelsysteme in jedem Gebrauchsland nutzen.

WEEE - DIRECTIVA 2002/96/CE, 2003/108/CE (WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT).

La directiva es valida en toda la Union Europea y señala las medidas necesarias para prevenir la producción de residuos de aparatos eléctricos y electrónicos; para promover el reutilizo, reciclo y otras formas de recupero de estas tipologias de residuos; para limitar los efectos en el medio ambiente que vienen de los tratamientos y gestion de estos residuos; para armonizar las medidas nacionales de gestion de residuos de aparatos eléctricos y electrónicos.

El equipo marcado con signal de contenedor tachado  no debe eliminarse junto con la basura urbana.

Para la devolución de antiguo dispositivo utilizar los sistemas de recogida y devolución disponible en cada Pais.

PANZERI CARLO SRL ADHÈRE AU CONSORZIO ECOLIGHT – MILANO ITALY

WEEE - DIRECTIVE 2002/96/CE, 2003/108/CE (WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT).

La directive valable sur tout le territoire de l'Union Européenne établi des mesures afin d'éviter la production de déchets d'équipements électriques et électroniques; d'encourager la réutilisation des équipements usagés, le recycle et autres formes de récupération de ces typologies de déchets; de limiter les risques sur l'environnement causés par le traitement de ces déchets et par la relative élimination; d'harmoniser les dispositions nationales de gestion des déchets électriques et électroniques.

Les appareils d'éclairage marqués avec le symbole du porte-poubelle barré,  sont sujet à la collecte séparée des autres déchets urbains. Pour la restitution d'un dispositif usagé, il faut se servir des systèmes de restitution et de collecte offerts dans chaque pays d'utilisation.

PANZERI CARLO SRL ВХОДИТ В СОСТАВ CONSORZIO ECOLIGHT – MILANO ITALY

WEEE - ДИРЕКТИВА 2002/96/CE, 2003/108/CE (WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT) УТИЛИЗАЦИЯ ЭЛЕКТРИЧЕСКОГО И ЭЛЕКТРОННОГО ОБОРУДОВАНИЯ.

Директива действует на территории всего Европейского Союза и определяет ряд мер, целью которых является избежание накопления отходов электрического и электронного оборудования; содействие их повторному использованию, переработке и другим методам утилизации этого вида отходов; уменьшение рисков воздействия на окружающую среду при переработке и уничтожении отходов; приведение в соответствие национальных мер по контролю за утилизацией электрического и электронного оборудования.

Светильники, отмеченные символом с перечеркнутым мусорным контейнером,  нельзя выбрасывать с остальным бытовым мусором. Для их переработки следует обращаться в соответствующие государственные учреждения.

Pur mantenendo inalterate le proprie caratteristiche di base, i nostri articoli possono risultare parzialmente modificati rispetto a come sono raffigurati nel presente catalogo. Ciò è dovuto all'evoluzione a cui sottoponiamo i prodotti, con lo scopo di un miglioramento continuo. Anche i colori presentati nel catalogo sono da considerarsi puramente indicativi.

While maintaining the basic characteristics of the product, the Company reserves the right to make modifications at any time with the sole aim of improvement. The colours illustrated in the catalogue are intended only as examples. Unter Beibehaltung der wesentlichen Produktcharakteristiken behält sich die Firma jederzeit Änderungen zur Verbesserung der Produkte vor. Die in Katalog abgebildeten Farben sind unverbindlich.

Manteniendo las características base del producto, la Sociedad se reserva el derecho de realizar pequeños cambios con el fin de mejorar la calidad del producto. Los colores que se ven en el catálogo son sólo indicativos.

Tout en respectant les caractéristiques de base du produit, la Société se réserve le droit d'apporter modifications en tous les moments rien que pour amélioration. Les couleurs illustrées dans ce catalogue sont données à titre d'indication. Возможно некоторое отличие наших артикулов от их изображения в этом каталоге, при сохранении неизменными их основных характеристик. Это связано с нашим постоянным стремлением к усовершенствованию моделей.

Отделки, представленные в каталоге, так же должны рассматриваться как чисто ориентировочные.
